VOLVO APPROVED USED EQUIPMENT

As good as new, for significantly less than the cost of a new machine

Tested, approved and as good as new

Volvo Approved Used Equipment

“Approved” means a used Volvo machine that is in excellent condition.

- It means a machine that has been inspected by Volvo experts and put through rigorous testing before being made good, with brand new components fitted where needed.
- It means that the machine meets the highest standard, and that Volvo is prepared to put a warranty on it as a guarantee of quality*.

“Approved” means that you can put a Volvo quality used machine into frontline production use on your site, in complete confidence, for significantly less than the cost of a new machine.

We think that you’ll approve, too.

To find out more about Volvo Approved Used Equipment, please visit your local Volvo dealership or look online.

There is also a Volvo Used Equipment App available for your smartphone.

* Extended Coverage: for details please consult your Volvo dealership

The Approval process

- Inspected by experts
- Tested rigorously
- Parts and components replaced with new as necessary
- Bodywork and cab made good
- Application for certification
- When Certificate has been awarded, machine can be sold as Approved Used Equipment with an additional warranty
